

Sikkens XP Hardener

Issue

Akzo Nobel Solution

- Cool weather is an issue. Systems that cure faster at lower temperatures are needed.
- Having too many products causes confusion in the paint shop.
- Today's collision centers need a clearcoat that is consistent and easy to apply.
- When edging in new parts, a very fast clearcoat is needed.
- Sikkens X-tra Performance Hardener is formulated to give Autoclear III faster curing in cooler temperatures.
- Sikkens XP Hardener can cover the entire range of applications when combined with the Sikkens Activators.
- With Autoclear III, XP Hardener and Sikkens Activators' user-friendly characteristics, this should never be a problem.
- When combined with Sikkens Rapid Activator, the new X-tra Performance Hardener will be the fastest system offered in the Sikkens line.

FOR X-TRA PERFORMANCE

Sikkens XP Hardener from Akzo Nobel is specially designed for increased performance in all shop environments. But it has been found to perform especially well in cooler environments.

When mixed with **Autoclear III** and **Rapid Activator** Sikkens XP Hardener provides an air dry time of only 3 hours at 70°F (20°C).

When mixed with Autoclear III and the **Sikkens Activators**, the system meets National Rule basecoat/clearcoat averaging of 5.0 lb/gallon. The new mixing ratio with Sikkens XP Hardener is 100:33:50.

For fast and accurate mixing, use the Sikkens mixing stick number 25. Mixing ratios for Autoclear III are also available on the Mixit* computerized mixing system from Akzo Nobel Coatings.

Today's collision centers need a user-friendly, high-performance clearcoat that performs well in all environments. The Sikkens XP Hardener is designed to meet those needs. Used with Autoclear III, this hardener offers *X-tra Performance* for a wide range of shops. Whether you are painting high production or high-end restorations, you can paint with confidence.

Edging new parts has never been faster than today with Autoclear III, XP Hardener and Sikkens Rapid Activator.

With the Sikkens XP Hardener, Autoclear III and the Sikkens Activators, shops can now cover their entire range of clearcoat applications.

To put XP Hardener to work for you, contact your distributor or Akzo Nobel representative. For more information call **1-800-2SIKKENS**. Or visit us at www.AkzoNobelCarRefinishes.net. ■
