

LESONAL

New Toner Introduction

390912 “High Strength” White Toner (Toner #14)

Introduction of this toner will greatly improve the coverage rate in the clean white color range for Basecoat SB. There will be approximately 2500 formulas that will call for this new toner. These formulas will appear only when the Lesonal Special Edition Mixit CD-ROM is installed. CD-ROMs have been sent to all Lesonal SB Mixit shops directly from Akzo Nobel. It is critical that all customers have this toner on their mixing machine. Toner #14 DOES NOT replace the current white toner #12. Both toners should be stocked on customer's mixing machine.

3909013 295P Fine Red Pearl

As new cleaner and brighter car colors are introduced, Akzo Nobel continues to lead the way in offering the most accurate color match in the industry. Akzo is happy to announce the addition of 295P Fine Red Pearl for some alternate formulas. **These formulas will appear only when the Lesonal Special Edition Mixit CD-ROM is installed.** CD-ROMs have been sent to all Lesonal SB Mixit shops directly from Akzo Nobel. It is critical that all customers have this toner on their mixing machine.
