UNLEASH THE COLOR™

UNDERCOATS

Hot Bond HHU-2000™ Adhesion Treatment

Hot Bond Adhesion Treatment is an adhesion promoter developed to adhere to aluminum, steel, and galvanized and composite plastics. It can eliminate conversion coating, sanding or etching, and it provides excellent, unparalleled adhesion. Simply clean the surface and apply Hot Bond Adhesion Treatment. Then let your imagination run wild with the various combinations of Hot Hues finishes.

BASECOATS

Hot Basecoat Colors

Hot Colors are high-performance, high-productivity, factory-packaged basecoat colors with outstanding jetness that brings a new level of productivity to premium spot, panel and overall repairs. As a high-hiding basecoat, Hot Colors lay down smoothly, with trouble-free application and excellent mottle control. Designed for use with Hot Hues Binder HHM-6200™, Hot Hues Balancer HHM-6300™ and Hot Activator Standard HHA-8005™ for a superior appearance. Hot Basecoat Colors are available in the following factory-packaged colors:

Amber Ecstasy 741505HH™

Indigo Blast 741903HH™

Amazing Grape 791904HH™

Cherry Twilight 741905HH™

Plum Berry 741907HH™

PRODUCT FAMILY OVERVIEW

CLEARCOATS

Hot Hues Binder HMM-6200™ Hot Hues Balancer HMM-6300™

Hot Hues Binder and Hot Hues Balancer provide better film toughness and durability for an even stronger basecoat appearance – on the road or at the show. With improved reactivity, this binder and balancer help to deliver better overall paint system performance by improving the way Hot Basecoat Colors apply and handle.

Hot Rod Black HMM-6400™

Hot Rod Black is a 2K topcoat with excellent gloss and color retention. It offers high mechanical and chemical resistance, and infrared or low bake are possible. Hot Activators and Reducers can be used with Hot Rod Black to achieve the ideal results based on shop requirements.

For stripes or completes, Hot Rod Black is an ideal choice. It will not chalk or fade, so you can do it once, do it right – and go cruising.

Hot Clear HHC-5300™ Matte Clear

Hot Clear Matte Clear is a versatile, two-component matted clearcoat that achieves a semi-gloss appearance. It's an ideal product for that chopped, channeled and sectioned sled that needs only a matte finish to complete the old-school look. It also provides new possibilities for both exterior and interior finishes.

Hot Clear HHA-5301™ Matte Clear Activator

Hot Clear Matte Clear Activator is designed to be used exclusively with Hot Clear HHC-5300™ Matte Clear to achieve the ideal results, based on shop requirements. For a semi-gloss finish, simply mix this activator 4:1 with the matte clear.

UNIVERSAL

Hot Efx Colors

Available in pearl and xirallic colors, Hot Efx Colors provide a bright and clean appearance. With unexpected glitter and sparkle, these colors are more brilliant in appearance than other pigments.

Hot Efx Colors are available in the following pearl and xirallic colors:

White Pearl HHM-6000™

Red Pearl HHM-6001™

Blue Pearl HHM-6002™

Gold Pearl HHM-6003™

Copper Pearl HHM-6004™

Violet Pearl HHM-6005™

Green Pearl HHM-6006™

Orange Pearl HHM-6007™

Crystal Silver HHM-6101™

Glitter Gold HHM-6102™

Radiant Red HHM-6103™

Shimmer Blue HHM-6104™

Hot Intercoat Adhesion Promoter HHM-6222™

Hot Clear Intercoat Blending Clear is the clear choice for custom finishes everywhere. It is designed to protect custom graphics and artwork from tape marks, and it can be used as a blender for smooth tapering of pearls and candy colors.

Hot Reducers Fast HHR-7065™ Medium HHR-7075™ Slow HHR-7085™

Hot Activators Fast HHA-8003™ Standard HHA-8005™

Hot Reducers and Hot Activators help you fine-tune performance around your repair type. Hot Reducers – available in Fast, Medium and Slow – deliver excellent application latitude, and two Hot Activators let you fine-tune performance for ultimate appearance or higher throughput on spot repairs.

These universal products are designed to achieve ideal results at different temperatures and shop conditions and with various-sized repairs.
