

ColorNet®, Wizard®, Univers Enhancements

January/February 2010

Update 1232/1233

Supply Management

Introduction:

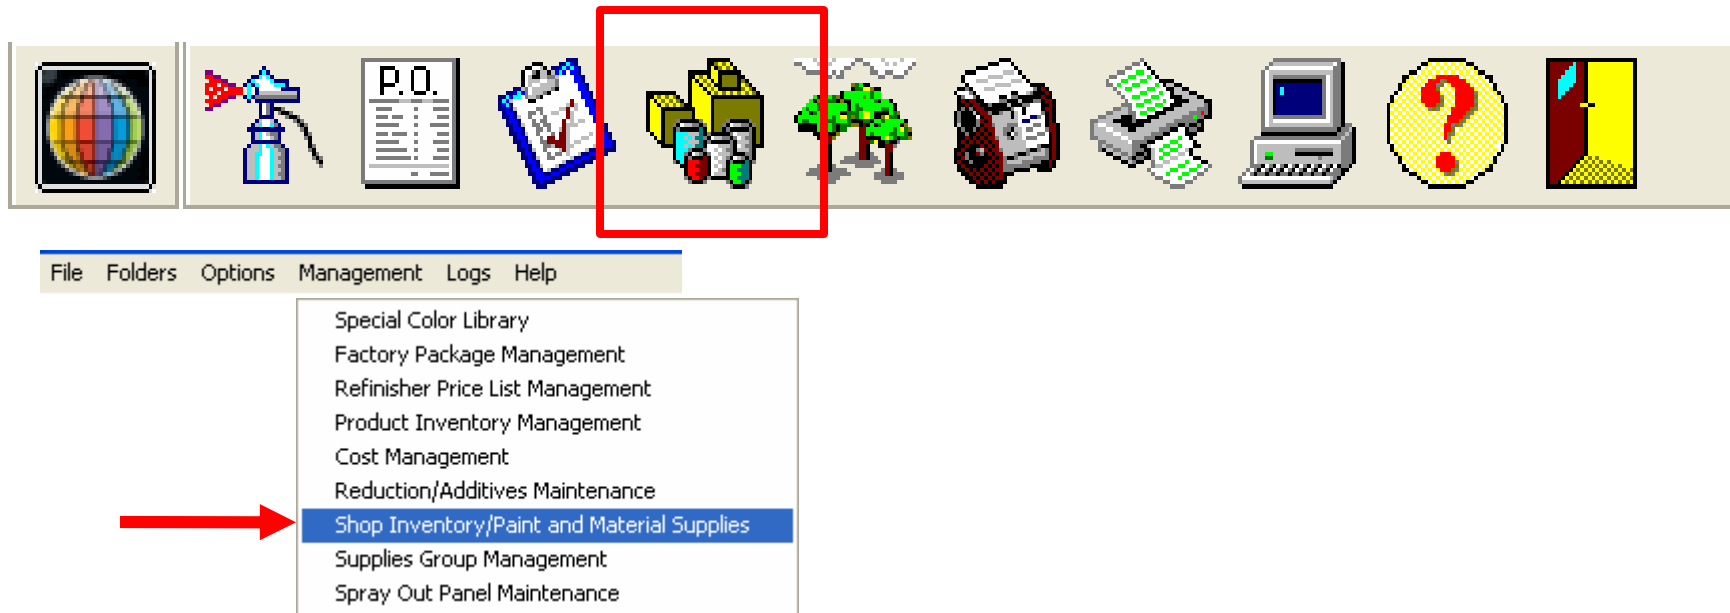

- Over the next few months there will be several enhancements made to Supply Management in ColorNet, Wizard and Univers.
- The purpose of these changes are to simplify the use of Cost Tracking and Supply Management for the body shop.
- In January (1232), Spies Hecker and Standox customers will see the changes followed by DuPont customers in February (1233). Note: all jobbers will get this change in February!
- In addition to the changes listed on the following pages, plans also include to add the bar code reader, ability to print bar code labels and up load jobber supply lists in to supply management

Supply Management

Background:

- In the past, the shop had to maintain two separate supply lists for Cost Tracking and OrderNet. This required considerable duplicate effort to maintain both lists.
- With this change, both Cost Tracking and OrderNet will be easier to use
- The following slides explain the changes

Supply Management

You can access this list by either clicking the Shop Inventory icon on the ColorNet Toolbar OR select Shop Inventory / Paint and Material Supplies from the Management Menu

Supply Management

Description	Expense Type	Cost Type	Unit Cost	% / Gal	Default
2604-400 GRIT SOFT PAD	PAINT	FIXED	1.89	0.0%	Yes
2622-5X9 1200 WET/DRY	PAINT	FIXED	0.63	0.0%	No
2623-5X9 1500 WET/DRY	PAINT	FIXED	0.63	0.0%	No
26334-3/4 MASK TAPE (FT)	PAINT	FIXED	0.01	0.0%	No
416-METAL GLAZE (OZ)	BODY	FIXED	0.55	0.0%	No
4213-PURGE & CLEAN (QT)	PAINT	FIXED	2.39	0.0%	No

The shop has the option of completing both sets of data or just the fields needed for Cost Tracking

For OrderNet use, check the box marked "Stocked" (fields have not changed)

For Cost Tracking use, check the box Paint and Material (fields have not changed)

Supply Management

Fields in the blue box are used for OrderNet

Fields in the red boxes are used for Cost tracking

Note "Sales Information" box is used for both processes!

Supply Management

Warning! Any previous “supply” back up files will not work with the new system. You MUST re-create the file using the new format by selecting the “Invent table” within the back up program.

Supply Management

In the past, the shop had to maintain two different supply lists to OrderNet and Cost Tacking.

Many shops use Cost Tracking but many did not take advantage of OrderNet because the maintenance time

The two forms have been combined to make it easier for the shop who desires to use both functions

There will be WebEx's beginning in January to review the changes
