

New Product SCB – Special Crystal Bases

As a color match leader for Automotive Refinish applications, the color specialists for R-M know the challenges that technicians face on a day-to-day basis. Manufacturers are constantly pushing the envelope with new pigments, shades and effects that challenge the most experienced technician.

To keep in line with the R-M Brand's Value and Versatility, R-M Product management is launching nine Special Crystal Bases to keep our color match and productivity ahead of the competition.

The new Special Crystal Bases will allow shops to mix any current automotive passenger car colors with the Diamond or Onyx HD basecoat systems.

Special Crystal Bases

SCB15L - Ultra Silver
