

Introducing Cromax® Pro WB05™ Jet Black Toner

DuPont Refinish announces the introduction of Cromax® Pro WB05™ Jet Black Toner. WB05™ will take the place of WB9900™ as the preferred tint for mixing machine color formulations requiring jet black color position. By description, WB05™ toner is described as: "Gives a dark and desaturated cast head on. The WB05™ is slightly bluer than the WB06™ Black. WB05™ should be used instead of WB06™ when pearl is the dominant effect."

WB9900™ Jet Black will be offered for use as a factory packaged color for a limited time.
