

EPA 6 H RULE

As a service to our customers we have worked very hard to put together a complete program to train our shops on the 6H Rule.

- 10 Trained Kline's employees to train and issue your Certificate of Training
- A constant and direct contact with our region's Federal EPA, DEP, OSHA and Air Quality Control Agents to be sure that our customers are receiving the most current and correct information pertaining to our industry and its' regulations.
- Book training and hands on training are provided as they are both required by regulation to be completed in order for you and your employees to be compliant.
- Consideration for you and your employees' time is of the utmost importance to our program.
- Training is done in your shop by appointment.
- Training is done during the normal work day and without a sales pitch of products. Our goal is to inform and train you.
- Our program is a continuing program available to your shop for retraining and training of new employees as they are added.

**Contact your Kline's Store Manager or Outside Sales Representative
For More Details On Our Program.**

KLINER'S – KEEPING YOU INFORMED!!!!!!!
