

FAC PAC INFORMATION

OEM manufacturers sometimes introduce colors that contain special pearls or unique pigments. If these pigments are low in usage, DuPont Refinish will offer those colors containing the unique pigment in a factory package quality only. When more colors are introduced using that new pigment or special pearl, it will be added to the MasterTint® mixing machine. The following is the most up-to-date list of Fac Pac only and Fac Pac preferred colors:

Mfg.	Mfg code	Stock #	RX #	Quality	Color Name
Chrysler	PEL	F7996		K	Inferno Red Effect**
Chrysler	PHG/FHG		768575	K	Plum Crazy Effect
Chrysler	PVE	P2236		K	Tangerine Orange Effect
Honda	YR539P(L)	P7304		K	Sunset Orange Effect
Mazda	25F	P6647		K	Garnet Red Effect**
Mazda	27A		100990	K	Velocity Red Effect*
Mitsubishi	M03		778383	K	Sunset Orange Effect**
Nissan	A12		736625	K	Imperial Orange Effect
Nissan	CY0	P0932		K	Brown Apricot Effect
Subaru	33J		747402	K	Garnet Red Effect
Toyota	3P4	M9318		K	Rose Effect**
Toyota	4R8		738766	K	Hot Lava Orange Effect

* These colors are tri-coat systems that consist of a mixing machine basecoat and a factory package mid-coat. This means you can mix the basecoat using your mixing machine tints, but for the mid-coat you must use the Factory Package. There are no mixing formulas available for the mid-coats.

** The Factory Package is preferred due to unique pigmentation. There is a mixing machine formula available, but the Fac Pac is recommended.

No asterisk means factory package only.
