

PAINTING TIPS

January 11, 2008

DOUBLE-TWIST TO ATTACH LID

It is crucial that you turn the Lid to the LEFT until the Lid threads align with the Ring threads (you will hear audible "click" sound), then turn Lid to the RIGHT until tightly locked to Ring.

KEEP REUSABLE HARD CUP CLEAN

If paint spills onto the Cup (under the Ring) make sure to clean that area after spraying. This will make sure that the Ring is seated properly before attaching the Lid.

LOAD PAINT AND WIPE SPILLAGE

ASSEMBLY INSTRUCTION # 4 PROVIDED IN KIT
After loading paint, clean Liner flange/Ring area of any spilled paint before attaching Lid.
