DRIVEN BY DURABILITY

NEW LEAD FREE TONERS ANNOUNCEMENT

Akzo Nobel is pleased to announce the introduction of three new Lead Free toners in the U-Tech assortment. These toners will eventually replace lead containing toners but due to pigment differences they are not direct replacements. Only recently developed color formulas currently contain these new toners. However, in the next few months more of the lead containing colors will be redeveloped with the lead-free toners. Since not all lead containing colors will be converted, please call the tech line to report any lead containing formulas that you are currently using and will need to be converted to a lead-free formula.

Item #	Description	Fill Size
398506	TINT 224 LF LEMON YELLOW QT	Quart
398507	TINT 232 LF MEDIUM YEL GL	Gallon
398508	TINT 287 LF MOLY ORANGE GL	Gallon

See below for reference toners LF versus lead containing. Again, note that these are not direct replacement. The formulas need to be redeveloped.

Item #	New LF Toners	Item #	Old Lead Toners
398506	TINT 224 LF LEMON YELLOW QT	399031	TINT 223 LEMON YELLOW QT
