

Introducing Tyvek® with the new Comfort Fit Design

Customers spoke, we listened. Our new garments made with Tyvek®, long the first choice in protection, are now better than ever!

We are pleased to announce a new line of Tyvek® spray suits – offering the best balance of protection, comfort and durability to you!

Protection

- Made using a proprietary manufacturing process, Tyvek® features an inherent barrier to particles less than 1 micron in size.
- The confidence afforded by Tyvek® can extend to the job. The unique fabric structure minimizes the possibility of dry particles leaving the suit and contaminating the paint job.

Durability

- Tyvek® lasts. Laboratory tests prove that it retains barrier after abrasion while competitive material loses up to 60% of their barrier protection
- Tyvek® can withstand the rigors of the workplace without compromising barrier protection!

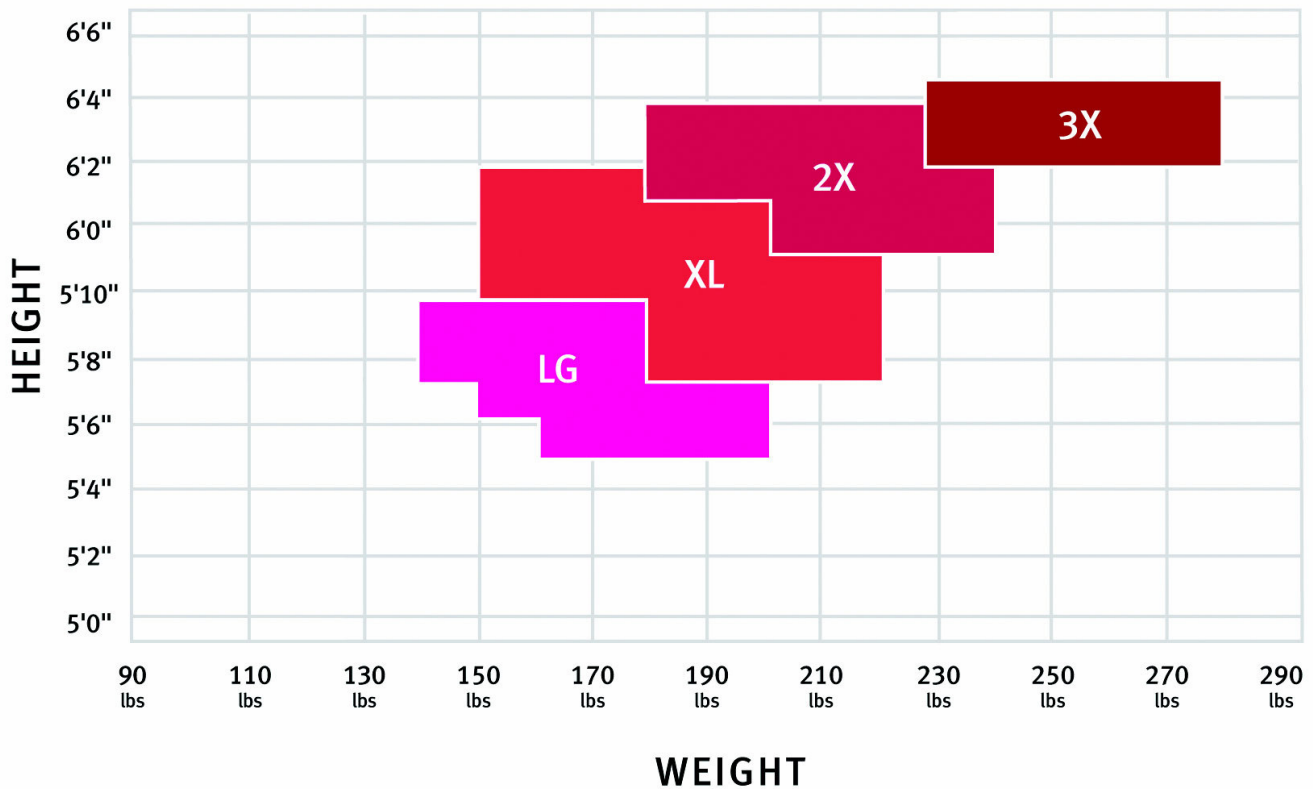

Comfort

- Unlike film-based garments, Tyvek® uses ultimate light weight fabric that breathes well, keeping the body cool
- Elastic cuffs at the wrists and ankles keep the suit in place.
- Greater range of movement while stretching and bending
- More room throughout the back providing improved mobility
- More tailored fit and better overall comfort
- Reinforcement in high stress areas for fewer blowouts
