No. TSB 08-002 US & CAN

Subject: Color Build Plus / APPR for Refinishing of Plastic Parts

NEW RECOMENDATION:

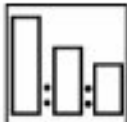

Colorbuild Plus has been in the market for several months. With the increased drying speed of this new material a few issues have arisen.

When technicians refinish plastic parts with Colorbuild Plus utilizing All Plastic Reducer there could be sensitivity after extended flash times. This can cause a lifting issue in the system.

In order to eliminate this potential, it is now a recommendation to use only Colorbuild Plus Sealer Hardener Slow for all applications using the All Plastic Reducer.

Please communicate this new recommendation to all of your customers.

Wet On Wet

100 -Colorbuild Plus.
25 -Colorbuild Plus Primer Sealer Hardener Slow.
35 -All Plastic Primer Reducer

Use Sikkens measuring stick
5 (Orange)

Additional questions or concerns should be addressed by contacting the Akzo Nobel Technical Manager assigned to your Market or the Akzo Nobel Tech-line representatives at 1-800 618-1010.
