

Commercial Vehicle OEM Truck Manufacturer Reference List

We are pleased to announce that a listing of major CV OEM truck manufacturers and their associated colors is now available on the [Masters of Quality](#) website.

One common question that continually arises is; Do we have formulations for medium and heavy duty trucks other than International? The answer is yes. You will see in the listing of the major truck manufacturers the OEM formulations associated with them. Some of the specifics of the CV OEM color world are different than what we are familiar with in the OEM car world, as pointed out below.

Most Truck Buyers have an unlimited choice of colors:

Most truck manufacturers have a standard color offering that could range from 5 to 50 colors. They may also have a premium color library with an additional 100+ colors. If a buyer wants a truck painted a specific color not in the manufacturer's library, most manufacturers will accommodate this request. Thus, the choices to a customer in the truck world are virtually limitless. As an example, our International Truck Color Library has over 5,000 colors. Other truck manufactures have similar libraries.

OEM Truck Coding Systems:

International Trucks have the paint code printed on a sticker which is on the firewall behind the engine. An example would be 9219 which is their most popular white. Most dealers obtain the paint code by accessing the line set ticket on their intranet system (ISIS) by utilizing the VIN number.

Freightliner, Western Star, and Sterling trucks have a number that starts with N or L and cross directly over to DuPont numbers. **Peterbilt and Kenworth** use similar numbering systems. An example would be N0126.

Volvo truck paint codes on the vehicle start with the number 980 and an example would be 980-4B7.

ALLENTOWN: 1-610-433-3203 / HAZLETON: 1-570-454-7616 / PHILLIPSBURG: 1-908-859-5911
POTTSVILLE: 1-570-622-4010 / READING: 1-610-929-4737 / SCRANTON: 1-570-344-8516
STROUDSBURG: 1-570-424-2253

Mack truck paint codes on the vehicle start with the number 944 and an example would be 944-2749.

FLNA Numbers:

FLNA stands for Fleet North America and has a number assigned by Akzo Nobel when we make a specific color for a specific fleet. An example would be Coca-Cola Red which is FLNA3062. The number is specific to the fleetowner (Coca-Cola) and not any truck manufacturer. If a new International Truck leaves the factory painted Coca-Cola red it will have a code beginning with NAV, not an FLNA number.

Many of the trucks that OEM truck manufacturers sell are sold to a specific fleetowner. While we may not have an OEM code from the truck manufacturer, we will be able to supply a color that matches the specific fleet. An example would be if Freightliner sold a truck to Coca-Cola we may not have a specific Freightliner code, but would certainly have a matching color, that would be an FLNA number. Our FLNA library is in the thousands and has information for all major fleets. The attached listing does not contain the thousands of FLNA colors we have, it only contains the specific OEM codes we have for these manufacturers.

What you will find in the listing:

- OEM Codes from the specific manufacturers, if that code crossed directly to a competitor's number you will find the code listed under the competitor.
- Akzo Code
- Competitive Crossovers
- Color Name
- Other trucks that the code may be used on. Many Volvo colors are also used on Mack trucks. Many Freightliner colors are used on Western Star and Sterling trucks. Many Peterbilt and Kenworth colors are the same. To save space we have used the following abbreviations in the "also used" column.

FRE = Freightliner
KEN = Kenworth
MAC = Mack
PBT = Peterbilt
STL = Sterling
VOLT = Volvo
WES = Western Star

- You will also find out what product lines we have the product available in.

ALLENTOWN: 1-610-433-3203 / HAZLETON: 1-570-454-7616 / PHILLIPSBURG: 1-908-859-5911
POTTSVILLE: 1-570-622-4010 / READING: 1-610-929-4737 / SCRANTON: 1-570-344-8516
STROUDSBURG: 1-570-424-2253

In Closing:

- We have thousands of colors available for all trucks, not only International, this is a listing of the OEM specific codes only not our entire assortment.
- As you will see in the listing that many colors are in development and are being added daily. If you have a specific need, please let the Techline know and we can expedite it.
- For specific Fleet and Truck Color information please call the color lab at 866-817-5053 or visit the **Commercial Vehicle webpage on the MOQ website at www.mastersofquality.net.**
