

851 Prep and Wash

Number: RMBUL2115-E

As part of its unending commitment to meeting the needs of our customers, R-M Brand Management is introducing just what you need to prep and wash your vehicles for coating—a great new R-M product called **851 Prep and Wash**. **851 Prep and Wash** is a fast, convenient product for cleaning and prepping the substrate for coating. **851 Prep and Wash** can be used on any non-porous, previously coated surface or on raw plastic, and **851 Prep and Wash** can be applied directly to the substrate with a wet grey scuff pad.

The new **851 Prep and Wash** can help improve your productivity and lower your material and labor costs. It can lower your material cost because you do not need to buy as many products for the cleaning of vehicles as before, and it helps lower labor cost because the vehicles can be cleaned better and faster with **851 Prep and Wash**.
