2 cups per box – 8 cups per case.
- Large (950ml capacity):
1 cup per box – 4 cups per case.

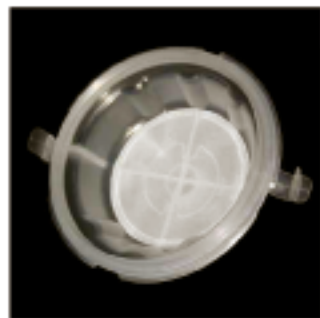

From the world leader in paint filtration, the new, advanced Gerson Paint System saves you time and money by simplifying assembly, use, clean-up and disposal.

Two twists and the patent-pending *unitized* Lid/Liner is securely assembled, ready to quickly lock in place to your spray gun. Spray from any angle – even upside down! Select from a wide array of spray gun adaptors to fit any gun.

Unlike other paint systems, the *unitized* Lid/Liner assembly is guaranteed never to come apart during disposal – eliminating the hazard and mess of spilled paint. Or, it can be securely sealed with the provided Caps for use in future spraying of the remaining paint. However you handle it, the *unitized*, leak-proof Lid/Liner assembly is guaranteed to remain securely sealed during disposal or storage!

The precision-engineered Liner collapses for complete drainage and a true spray pattern. With a large built-in Lid Filter and the time-saving, reusable Cups with pre-printed universal paint scales, the Gerson Paint System is as simple to use as a baby's bottle!

Economical to use and more affordable to buy, the Gerson Paint System will help increase your profit TODAY.

Worldwide Patents Pending.
The Gerson Paint System is not for sale or use in Germany.
