

TECHNICAL BULLETIN

Honda Code YR539P (L)

Honda code YR539P (L), stock code P7304 Sunset Orange Effect is a ChromaBase[®] factory package only color due to unique OEM pigmentation. Currently, this color is only used on the Honda Element. Honda applies this color over a black primer base but does not achieve full hiding so the use of VS7 or a black base coat is recommended. Due to the transparency of this color it should be considered almost a tri-coat.

For future factory package batches of Honda Code YR539P (L), the label shown here will be affixed to the top of the can.

YR539P (L) P7304 is applied by Honda over a black primer/base and not to full hiding. The use of VS7 or a black base coat is recommended. Treat like a tri-coat.
