COLOR BALANCER
ITS ALL ABOUT TIME
PATENT PENDING

Aerosol Application

USES: The Painted Panel, or Panels, Appear Lighter or Darker in Color than the Adjacent Panel.

CB100
Use to Darken White Body Panels

CB101
Use to Darken a Lighter Color Body Panel

CB102
Use to Darken a Medium Color Body Panel

CB103
Use on Dark Colors to Make Darker.

CBC
Panel Cleaner & Adhesion Promoter

CBR
Chemically Removes CB Products*
*1 spray
Note: CBR
ColorBalancer can be removed using ColorBalancer Remover (CBR). When finished, rub with CBC Cleaner and react at necessary.

Application:

STEP 1.) Clean

Area to be sprayed should be cleaned. Using ColorBalancer cleaner. It both cleans and chemically prepares the surface for adhesion without the need for sanding.

STEP 2.) Mask

Areas surrounding area to be sprayed should be masked using 12" paper to reduce overspray.

STEP 3.) Spray

Hold product 8"-10" from surface. Spray edge of panel that needs to be darkened in light & even strokes, blending product away from panel edge. Allow 10 min. dry time at 70°F. Turn can upside down and spray for 2 seconds to clear the nozzle.

STEP 4.) Hand Buff Edge (opt.)

If needed, hand buff perimeter of sprayed area.

NOTE: ColorBalancer Does NOT Need to Be Clearcoated.

Examples:

Use ColorBalancer Aerosols on Bumper Cover to Darken the Edge

Use ColorBalancer Aerosols on Quarter's Edge to Darken Color
