## TECHNICAL SERVICE BULLETIN

### Low Gloss Clear Application for Limco LC4000

**Number: LIMBUL1055-E**

Limco, your economical paint solution provider, is pleased to offer customers the following formulations for obtaining semi-gloss, medium gloss, and flat finishes when using LC4000 as your clearcoat. When refinishing vehicle areas that require a dull or flat sheen, these formulae can be utilized with both Limco Supreme as well as the Limco 4 basecoat systems.

Refer to the following BASF stock numbers in SmartTrak and SmartColor software for easy access to RFU formulas using either LF10 or LA1252 flattening agents, or call BASF customer service at 1-800-825-3000 (option#1) to obtain the formula settings.

LF10		LA1252	
Flat Gloss	679961	Flat Gloss	704945
Semi Gloss	679962	Semi Gloss	704947
Medium Gloss	679963	Medium Gloss	704946

**Note:** Utilizing a buffing compound and/or polish will bring the LC4000 to its normal gloss level. It is not advised to buff or polish LC4000 when using a low gloss formula.

**At BASF, our goal is to help you make *your* business better. If you have any questions on Limco 4 or any other BASF refinish product, you may contact the BASF Technical Service Department at (800) 825-3000, or visit our website at [www.basrefinish.com](http://www.basrefinish.com).**
