## **Autobase Plus Q964R Update Bulletin**

All colors in the Mixit Database that require Q964S have now been formulated with Q964R. With these Q964R formulas 100% in place, we no longer need to support the use of Q964S. However, formulas for both items will remain on the Mixit System until the supply of Q964S is depleted. **So please use up your Q964S before switching entirely over to Q964R.**
